

Saif Ullah Khan

Phone: 03465698202 Email: saifaws001@gmail.com

Professional Summary

Motivated and results-oriented professional with experience in cloud and DevOps technologies along with web application development. I enjoy solving problems, improving processes, and building reliable solutions that help teams work more efficiently. With a background in both development and infrastructure, I can adapt quickly to new technologies and work effectively in collaborative environments. I am currently looking for a DevOps role where I can continue learning, take on new challenges, and contribute to the success of the organization while growing my skills in cloud and automation technologies.

Training Experience

Cloud Computing Trainee

- Designed and deployed scalable cloud infrastructure using EC2, VPC, S3, IAM, CloudWatch, Load Balancers, Lambda, and DynamoDB.
- Implemented monitoring, backup, networking, and security solutions on AWS.
- Worked with highly available and fault-tolerant architectures.

Microsoft Azure Administration *Azure Administrator DevOps Engineer*

- Performed hands-on labs involving Azure Virtual Machines, Virtual Networks, Storage Accounts, Monitoring, and Identity Management.
- Implemented CI/CD pipelines using Azure DevOps.
- Managed Azure infrastructure and cloud deployments.

Projects

Two-Tier WordPress Application Deployment on Docker

- Deployed a two-tier WordPress application on an AWS EC2 instance using Docker containers.
- Configured separate MySQL and WordPress containers with Docker networking.
- Implemented persistent storage and container communication.
- Published the application through custom port mapping and tested end-to-end functionality.

Jenkins Server Deployment on AWS EC2

- Deployed Jenkins on an AWS EC2 instance using Docker.
- Configured Jenkins pipelines for automated build and deployment workflows.
- Integrated GitHub repositories with Jenkins for Continuous Integration.
- Managed Jenkins administration, plugins, and security settings.

MERN Movie Ticketing and Management System (Final Year Project)

- Developed a full-stack movie ticket booking and management platform using MongoDB, Express.js, React.js, and Node.js.

- Implemented user authentication, movie scheduling, seat booking, and payment workflow modules.
- Developed RESTful APIs and responsive frontend interfaces.
- Applied database design principles and role-based access control.

Microsoft Azure Hands-On Labs

- Created and managed Azure Virtual Machines and Virtual Networks.
- Configured Azure Storage Accounts and monitoring services.
- Implemented Azure Identity and Access Management (IAM).
- Practiced Azure DevOps pipelines and deployment automation.

AWS Cloud Infrastructure Projects

- Built scalable cloud infrastructure using EC2, VPC, S3, IAM, CloudWatch, and Load Balancers.
- Configured serverless solutions using AWS Lambda and DynamoDB.
- Implemented monitoring and backup strategies.

Education

Islamia College University Peshawar, Pakistan Bachelor of Science in Software Engineering

Certifications

- Microsoft Certified Azure Administrator (AZ-104)
- Microsoft Certified DevOps Engineer
- AWS Certified Solution Architect Associate
- Advance Web Application Development

Skills

Cloud Platforms: AWS, Microsoft Azure

AWS Services: EC2, VPC, S3, DynamoDB, Lambda, IAM, CloudWatch, Load Balancer

DevOps Tools: Docker, Ansible, Git, GitHub

Operating Systems: Linux

Programming Scripting: Shell Scripting, JavaScript

Web Development: MongoDB, Express.js, React.js, Node.js (MERN Stack)
